

ACC-SOLP-65W-1

65W Solar Panel

Verkada’s ACC-SOLP-65W-1 is a 65W solar panel that can provide power to the CR63-E remote camera in a variety of deployment scenarios. It can be mounted on a pole using the ACC-MNT-SOLP-1 solar panel mount.

If the CR63-E is deployed in an environment that may experience a lack of sun for several days or more, the camera can be paired with an ACC-BAT-430WH-E-1 external backup battery, which can store power captured by the solar panel for a longer period of time.

To help determine the right power accessories for a specific deployment, use the [power accessories calculator](#).
