

April 26, 2021

To Whom It May Concern:

On March 9, 2021, Perkins Coie LLP engaged FireEye Mandiant ("Mandiant") to investigate the suspected intrusion into Verkada's environment. Our investigation relied on relevant endpoint artifacts and log data, as well as the comprehensive methodology that Mandiant and Verkada established to determine the extent and impact of the attacker's intrusion.

We have completed our investigation. After reviewing Verkada's report on the incident, posted to its website on April 23 2021, we endorse the completeness of its investigation methodology and the accuracy of its findings.

Sincerely,

Jay Taylor  
Managing Principal Consultant
