Introduction

What's in the Box

**Outdoor Remote
Deployment Camera**

Mount Plate
(Attached to camera)

Pole Mount
(Attached to camera)

**T10 Security Torx
Screwdriver**

Verkada SIM Card
(Installed in camera)

Wall Mount Screws (4 pcs)
Length: 25mm Diameter: 4mm
Drive: #2 Phillips

**T25 Security Torx
Allen Key**

MC4-Style Pigtail

PoE Pigtail

**Barrel Jack
Pigtail**

Wall Anchors (4 pcs)

Small Pole Straps (2 pcs)
For Pole Diameter: 48-81mm (1.9-3.2")
Drive: #2 Phillips

Large Pole Straps (2 pcs)
For Pole Diameter: 84-152mm (3.3-6.0")
Drive: #2 Phillips

What you'll need

- A smartphone or laptop
- A #2 Phillips screwdriver or power drill with a #2 Phillips driver bit
- 1/4 inch (6.5mm) drill bit for wall anchors
- 1/8 inch (3mm) drill bit for pilot holes
- Solar panel

Connect

For easy registration and setup, scan the QR code on the product.

If you prefer to manually register your product, please proceed to: verkada.com/start

Introduction

Overview

Installation Orientation

Overview

Microphone Switch

The microphone switch allows you to physically disconnect the microphone in the camera unit, guaranteeing that no audio will be recorded.

Camera Audio is enabled by default.

To disable Camera Audio, move the switch into the left position.

Alternatively, Camera Audio can be disabled in your Command account.

Microphone Enabled

Microphone Disabled

Power Switch LED Behavior

- **Solid Orange**
Camera is on and booting up.
- ⚡ **Flashing Orange**
Camera is updating firmware.
- **Solid Blue**
Camera is running, connected, and recording data.
- ⚡ **Flashing Blue**
Generic network error. Contact support.

SIM Card LED Behavior

- **Solid White**
SIM Card is detected.
- ⚡ **Flash White**
SIM Card is detected and running.

Placement

For best night vision, avoid overhangs or obstructions. These may reflect the camera's IR illumination and reduce the image clarity in night mode.

Preparation

Connect Device 1/3

Note: This step can be done after mounting, although registering the product first will ensure it is in working order prior to mounting.

Open the I/O Bay door by using the provided T10 Security Torx Screwdriver.

Toggle the power switch to the ON position to turn the camera on.

Preparation

Connect Device 2/3

For easy registration and setup, scan the QR code on the product, or the box label.

To access the QR code and serial number on the camera, loosen the Mount Plate Security Screw using the provided T25 hand tool.

The screw should be backed out approximately .2" (5mm) from the Mount Plate. Do not fully remove the screw.

Twist the Mount Plate counter-clockwise then pull the Mount Plate off of the underside of the Base Plate.

If you prefer to manually register your product, please proceed to:
verkada.com/start

Enter the serial number on the device or box label. Alternatively you can enter the order number.

Preparation

Connect Device 3/3

If the device battery is low or depleted, connect the PoE or DC power cable to charge the device.

For properly connecting the PoE cable, please refer to the *PoE Cable Sealing Assembly* section.

Installation

Mounting to a Pole 1/3

To unlock the Mount Plate from the Base Plate, loosen the Base Locking Screw using the provided T25 hand tool.

The screw should be backed out approximately .2" (5mm) from the Base Plate. Do not fully remove the screw.

To remove the Mount Plate from the Base Plate, twist the Mount Plate counter clockwise then pull the Mount Plate off of the underside of the Base Plate.

Installation

Mounting to a Pole 2/3

Hold the mount plate in the desired position on the pole. Route the pole straps through the side slots and around the pole.

Tighten with a #2 Phillips head screwdriver or drill bit to secure to the pole.

Mounting to a Pole 3/3

Align the mounting pegs to the holes on the base plate.

① Engage the mounting pegs and twist clockwise until you feel the camera lock securely in place.

② Once secured, tighten the T25 security screw using the provided hand tool.

Installation

Pigtail Options

Choose a pigtail from the box based on the use case. Plug the pigtail into the Outdoor LTE Camera.

MC4-Style Pigtail

M12 to MC4

PoE Pigtail

M12 to PoE (Must be used with a 48-57V passive POE cable)

Barrel Jack Pigtail

M12 to DC Barrel Jack

Installation

MC4-Style Pigtail Connection

MC4-Style Pigtail is used for connection to solar panel.

MC4-Style Pigtail

Solar Panel

Insert both connectors, from the solar panel into the MC4-Style Pigtail until you hear the click.

x2

Installation

PoE Cable Sealing Assembly

Must be used with a 48-57V passive PoE cable.

Thread cable-sealing components onto RJ45 cable.

Insert RJ45 plug into the jack.
Twist to lock body onto the RJ45 Jack.

Insert rubber seal into the body.

Screw the cap onto the body.

Adjustment

Adjust your camera to the desired viewing angle. Use the online stream to confirm image orientation. The image can be flipped 180 degrees in Verkada Command.

To lock the camera in place, use the T25 Security Torx Allen Key to tighten the screw on the ball joint.

To fully secure the device, rotate the Torx handle an additional 90 degrees.

Installation

Visor Adjustment

To adjust the visor, take the T10 Torx screwdriver and loosen the screw on the top of the visor.

Slide the visor to the desired position.

Slide the visor forward for Telephoto Zoom.

Slide the visor backward for Wide Zoom.

Tighten the screw to secure the visor in place.

Appendix

Compliance

Caution	<ol style="list-style-type: none"> 1. Maintenance and repair work must always be carried out by qualified technical personnel. Disconnect power from the unit when performing a maintenance task. 2. Wiring methods used for the connection of the equipment to earth shall be in accordance with the National Electrical Code, ANSI/NFPA 70, and the Canadian Electrical Code, Part 1, CSA C22.1. 3. The product must be installed and protected in a location that is not easily accessible and is away from impacts or heavy vibration. 4. The device is only to be connected to PoE networks without routing to outside plants. 5. If powered by a power adapter, the adapter should be properly grounded. 6. Please contact certified dealers for power adapters.
FCC Compliance	<p>This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:</p> <ul style="list-style-type: none"> -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.
ISED Compliance	<p>This device complies with ISED's licence-exempt RSSs. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>Le présent appareil est conforme aux CNR d'ISED applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) le dispositif ne doit pas produire de brouillage préjudiciable, et (2) ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.</p>
