

Improve Security and Convenience with Integrated Access Control and Physical Security

Verkada Access Control provides real-time visibility into access-based events across office buildings. With Verkada's unified physical security platform, building administrators can:

- Centralize access control across every building, site and door across your organization. Manage everything from a single pane of glass.
- Manage exterior doors, interior doors, office air quality, physical safety and more in Verkada Command.
- Enjoy seamless integration between Cameras, Alarms, Air Quality sensors and Guest Management to unify your physical security system on a single pane of glass.
- Integrate physical access control with single sign on platforms like Azure and Okta to integrate physical and cyber security.

Verkada for offices

10-year product warranty

Unlimited users

Automatic firmware and software updates

Technical support

Lower 10 year TCO

Predictable renewal costs

Key benefits

Native camera integration

Bring access events and video footage together by adding cameras to doors in just a few clicks.

Simple to install

Verkada's access control hardware can be configured with an industry leading 5 wires per door. Everything else is managed in the cloud, allowing for ultimate scalability.

Centralized management

Manage multi-site corporate campuses behind a single pane of glass, and empower end-users with an intuitive cloud-based software platform.

Straight forward pricing

Lower total cost of ownership with automatic updates and an industry-leading 10 year warranty on all hardware.

End to end Access Control

Manage employee credentials and access automatically from employee onboarding to employee offboarding. Easily design, print, issue and decommission employee badges.

Scalability

Add as many doors, credentials, and sites as needed. Credentials can be provisioned, utilized and monitored across multiple school sites.

Use cases

Remote and hands-free bluetooth unlock

Unlock doors from your mobile device via the Verkada Pass app, or any web-based browser via Command. Enable BLE to leverage any smartphone as a hands-free digital key card.

Centrally monitor your office building

View access, camera and other events from anywhere. Automate alerts and notifications by receiving configurable SMS or email alerts for security events at any of your facilities.

Configurable emergency Lockdowns

1. Trigger lockdowns from a panic button, Verkada Command or the Verkada Pass app.
2. Lockdown specific rooms and exterior doors while still allowing first responders access via Verkada remote unlock.

Automate door schedules for office hours

Schedule doors to automatically lock/unlock around work hours, and set exceptions to temporarily modify door access on holidays.

Tiered access to office, IT and storage rooms

Integrate video analytics with Access Control events. Identify possible tailgating events and responsible individuals.

Integrate with Azure AD, SCIM and SSO

Integrate with leading SCIM and SSO providers to streamline user commissioning and reduce liability with automatic off-boarding.

Where to install?

- Elevators
- Exterior doors, entrances, and exits
- IDF and server rooms
- Common areas such as lobbies and kitchens
- Supply closets
- Shipping and receiving areas

Customer testimonials

Resource One Credit Union

"We looked at what we spent with our previous vendor for an analog system with technology from the mid-2000s, and it was almost \$600,000 over the next 10 years [amortized]. We recognized that we had to move to a cloud-based system and all of the technological advantages that come with it."

Luis Alejandro Wong,
Chief Technology Officer

Third Bridge

"My team no longer takes on the responsibility of maintaining and patching vulnerabilities in the system. Verkada's product, and team, really take on the bulk of the work; they've exceeded our expectations in terms of service and support."

Alex Wiltz,
Director of Public Safety

Belron International

"I love automation. What stood out about Verkada was the native integration between video and access control, along with the ease of use and management. You have a badge around your neck or your phone in your pocket, and it just works."

Meredith Essalat,
Head of School
