

## Protect Students and Schools with Integrated Access Control

Verkada Access Control provides real-time visibility into access-based events across schools, campuses and buildings. With Verkada's unified physical security platform, school administrators can:

- Reduce liability and increase visibility by replacing physical lock and key secured doors with modern access control methods.
- Design, manage, print and issue student and faculty ID badges natively from within Verkada Command.
- Automate response policies with real-time alerts, alarms or notifications.
- View events remotely from mobile or desktop to respond in real time.
- Secure classroom doors with easy-to-install wireless locks to bring every door onto one cloud-based platform for easy management.

### Verkada for higher education

Up to 10-year warranty

Unlimited users

Automatic firmware and software updates

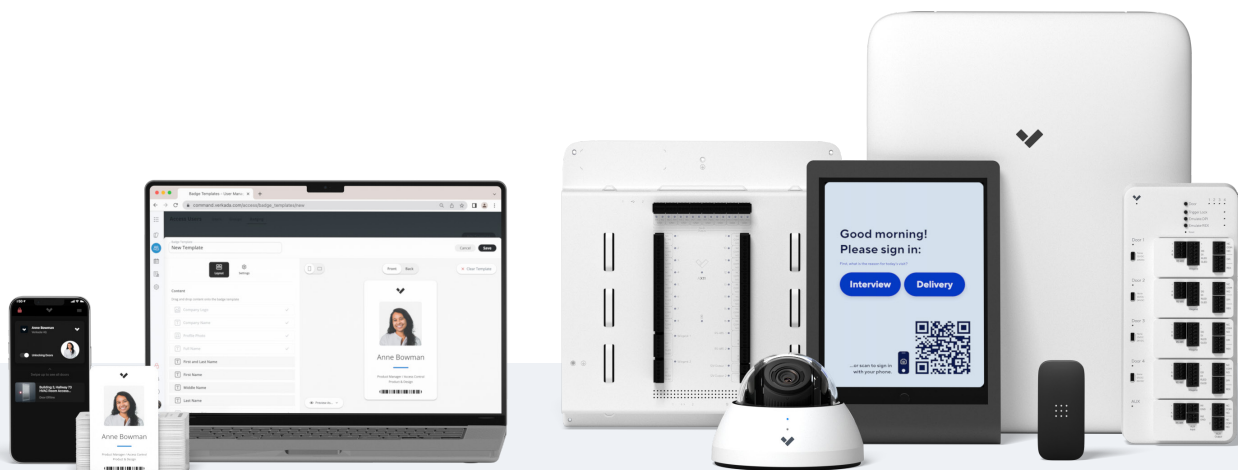

Technical support

Lower 10 year TCO

Predictable renewal costs

### Key benefits

#### Native camera integration

Bring access events and video footage together by adding cameras to doors in just a few clicks.

#### Centralized management

Manage multiple campuses behind a single pane of glass and empower end-users with an intuitive, cloud-based software platform.

#### Easy to use

Empower end-users with an intuitive software platform to reduce the dependence on your IT team.

#### Simple to install

With Verkada access control, you can add doors easily and quickly. Doors can be brought online in minutes.

#### Straightforward pricing

Lower total cost of ownership with automatic updates and an industry-leading 10 year warranty on all hardware.

#### Scalable

Add as many doors, credentials and sites as needed. Credentials can be provisioned, utilized and monitored across multiple school sites.

## Use cases

### Configurable emergency lockdowns

1. Configure custom lockdown scenarios to ensure your environment has the right response plan.
2. Trigger lockdowns from a panic button, from Verkada Commandor from the Verkada Pass app.
3. Lockdown classrooms and exterior doors while still allowing first responder access with Verkada's remote unlock capabilities.

### Provide students and staff with intuitive credentials

Design, print and issue student and faculty badges and/or enable users across your organization to use the Verkada Pass app for simplified BLE access and hand-free, remote unlock.

### Centrally monitor all your campuses

Receive configurable SMS or email alerts when doors have been propped open or there are off-hours entries.

## Where to install?

- School entrances and exits
- IDF and server rooms
- Common areas such as cafeterias, gyms, etc.

### Secure every door in your school

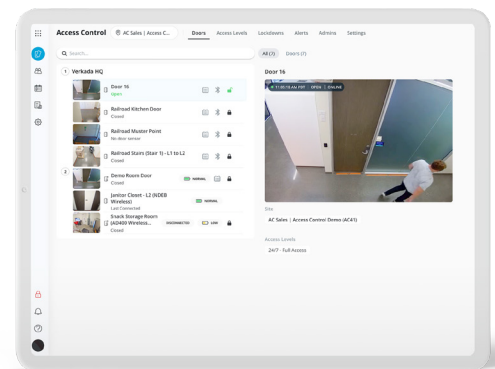

Secure every door type with wireless locks for interior doors, standard wired access control for exterior, high-traffic doors and more. Ensure that your school is safe and secure across every doorway.

### Simplify your credential management approach

Design, print and issue student and faculty badges and/or enable users across your organization to use the Verkada Pass app for simplified BLE access and hand-free, remote unlock.

### Integrate with Azure AD, SCIM and SSO

Integrate with leading SCIM and SSO providers to streamline user commissioning and reduce liability with automatic off-boarding.

- Classrooms
- Offices

## Customer testimonials

### Imperial County of Education (ICOE)

"The wireless locks integration allows us to bring more doors into Verkada's physical security platform, including classrooms in historic or concrete buildings. This gives us more visibility and granular control - including lockdown capability - over interior doors so we can better protect our staff and students."

**Luis Alejandro Wong,**  
Chief Technology Officer

### Greenfield Community College

"If we have another emergency situation, we need to be able to lock our campus down instantly. Verkada had everything I was looking for in an access system: centralized control, cloud-based, no servers required and intuitive enough that I don't need to spend a day training people how to use it."

**Alex Wiltz,**  
Director of Public Safety

MISSION DOLORES ACADEMY  
In partnership with the Megan Furth Memorial Fund

### Mission Dolores Academy

"The amount spent on cutting keys and reissuing keys if they get stolen is significant. Now, we can shut access down if a keyless card gets lost. We also have student files in one location, money in another - we can customize access to individuals and ensure confidentiality is being maintained."

**Meredith Essalat,**  
Head of School
