Get Alerted to the Types of Activity That Matter

Get real-time notifications when a camera detects certain activity taking place anywhere on your site, so you can take immediate action.

FALLING DETECTION

Get alerted when a person is detected falling to the floor.

Stay ahead of costly liability claims with proactive slip-and-fall alerts and linked footage.
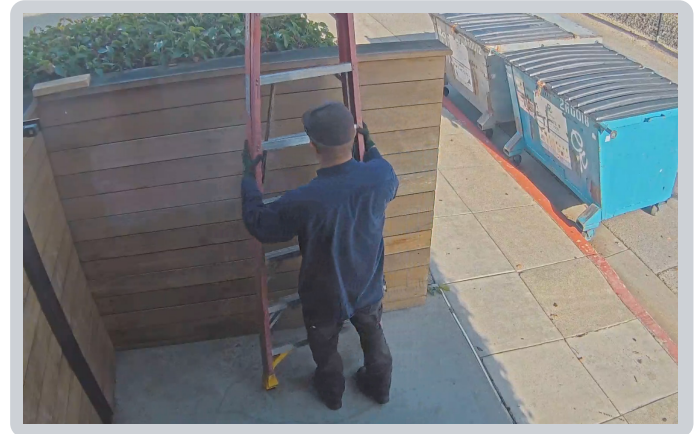

Get alerted to a medical emergency with real-time alerts that someone fell to the ground.

Notify janitorial staff if someone slips on a wet or unclean floor.

Improve safety by tracking where reoccurring falls take place.

CLIMBING DETECTION

Get alerted when a person is detected climbing over a fence or barrier.

Protect against perimeter intrusion, particularly in areas with frequent nearby motion.

Get alerted to wrong-way entrances or exits, like climbing a fence or hopping over a barrier.

Discourage climbing on equipment, like ladders or shelving.

Address line-jumping by getting notified if someone jumps over a stanchion or barrier.
