# Get Proactive Alerts and Speed Up Investigations

Verkada's powerful AI and computer vision capabilities help give you the information you need, when you need it - whether that means getting alerted the moment something happens or running a complete investigation in minutes.

SEARCH

Find what you're looking for in seconds

- Search using natural language, by attributes like clothing color, or upload a photo.
- Find vehicles by appearance or license plate, even if you don't have the full number.
- Visually reconstruct the journey of a person across your entire fleet of cameras onto a single, map-based timeline.
- Archive footage, save multiple clips as an incident report, and share with just a few clicks.

|				
Freeform text search	Clothing color	AI-powered unified timeline	Vehicle color, make, or model	Partial or similar license plate
Vehicle body damage	Gender appearance	People trajectories	Photo upload	Motion search

ALERTS

Get real-time alerts, take immediate action

- Use natural language to create custom AI-powered alerts, or start with industry-specific suggestions.
- Get alerted to someone falling, crowds forming, a license-plate-of-interest sighting, and much more.
- Avoid outages with device offline and tamper alerts.
- Set up alerts in just a few clicks and send via SMS, Slack, Microsoft Teams, email, and more.

Freeform text custom alerts	Industry-specific alerts	People & vehicle detection	Line crossing and loitering	Partial or similar license plate
Crowd detection	Animal detection	Activity detection	Third-party events	Offline, tampering, and occlusion
