

## Improve ATM Security With Hybrid Cloud Security Cameras

To effectively protect customers, faculty, and valuable assets, financial institutions rely on video security systems to monitor bank and ATM locations. Verkada's video security solution streamlines visibility, scales coverage, and allows customers to effortlessly monitor onsite and remote activities.

### Easy To Setup and Scale

With a standard Power over Ethernet (PoE) cable, cameras are brought online and the system is fully operational. No longer worry about NVRs, DVRs, or complicated configurations—simply plug and play.

### Quickly Find and Share Footage

With activity-based indexing and advanced search filters, quickly surface the footage you're looking for without having to spend hours scrubbing through footage. Once identified, securely share footage via SMS or link directly from Verkada's user-friendly interface.

### Reduce Liability Risk and ATM Fraud

Monitor banks and ATMs in a centralized platform to quickly surface incidents of theft, vandalism, and damage of capital assets. In addition to unlimited cloud archiving, Verkada cameras store up to 365 days of footage locally so recordings are always available for incident resolution.

### Monitor From Anywhere

Access footage remotely over limited network capacity with our bandwidth friendly solution. With an uplink bandwidth footprint of 20–50 kbps per camera, remote bank branches can have hundreds of hybrid cloud cameras operating without overflowing WAN uplink. In contrast, traditional cloud cameras tend to stream at 1–2 mbps.

## Financial Institutions Choose the CM41-S Split Camera to Improve ATM Security

### Compact Form Factor for Flexible Installation

The CM41-S' split body, 6-inch cable, and small size allows it to be easily installed in most standard ATMs.

### High-Sensor Resolution for Better Insights

Capture clear 5MP images to validate routine transactions and analyze suspicious activity.

### Edge-Based Processing to Simplify Investigations

Receive real-time People of Interest alerts via SMS or email with an image and a link to review associated footage.

### Hybrid Cloud Solution for PCI Compliance

Meet Payment Card Industry (PCI) compliance standards with 90 days of continuous footage stored in two places; onboard the camera and backed-up in the cloud.

## Built For Your Organization

### For IT Professionals

Eliminate the need for NVRs, DVRs, and complicated VPN configurations. Verkada's ATM video security solution is secure out of the box, easy to setup, and simple enough for non-technical users to manage independently.

### For Branch Managers

Minimize loss, protect assets, and get notified of meaningful activity in frame. Whether motion is detected after hours or a threat is detected in real-time, stay in the know without having to actively monitor the system.

### For Security Professionals

Streamline visibility and respond to incidents in real time. With the ability to quickly share live feeds with law enforcement, give local authorities the insight they need to respond to incidents appropriately, as they transpire.

## Customer Testimonials

### Peoples National Bank

"We have had multiple times where having cleaner footage helped us determine if the right amount of cash was given out, or who the person was that was making the transaction, or to prove it was who they said they were."

#### Eric Kruse

Director of IT, Networking, and Security

### Susquehanna Community Bank

"We now have a much higher level of confidence. If there is an incident, and my team needs to forward information to law enforcement, they can easily capture and transfer the footage."

#### Bill Weber

Information Security Officer

### Bank of The James

"There are two line items: the hardware and the software. No secret support fees, no hidden software upgrades or charges, and a 10-year warranty for all cameras. Verkada is a far better long-term financial investment."

#### Phil Hampton

IT Specialist
