

Safeguard Your Branch Network with Modern Cloud Physical Security

Overview

Banks and credit unions face a mix of growing threats — from ATM jackpotting and after-hours break-ins to coordinated fraud across branch networks. Verkada's cloud-based physical security platform helps large financial institutions proactively deter attacks, accelerate emergency response, and gain operational insights at scale.

Third
Bridge

Protect against evolving attacks

Strengthen security at ATMs

Deter jackpotting and physical attacks. Mini split cameras trigger tamper alerts when they detect vibration or movement at ATMs.

Discreet panic assistance

Protect bank tellers with mounted panic buttons that send instant alerts with linked footage to security teams or trigger a call to the police.

Guard drive-thru ATMs

Monitor drive-thru ATMs with ANPR cameras. Receive immediate alerts when a flagged vehicle is detected returning to a branch.

Find footage with AI

Quickly find relevant incident footage with AI-powered search. Simply type a description or upload a photo of a person or vehicle to retrieve video.

Track suspects across branches

Reconstruct a suspect's journey across multiple cameras and branch locations. See their path on a floorplan for faster investigations.

Unify alerts across systems

Easily integrate Verkada alerts and footage into your existing SOC tools with APIs, unifying visibility across branches.

Deter threats around the clock

Monitor high-risk areas

Safeguard ATMs and bank entrances with cameras that double as alarm triggers for motion, line crossings, and loitering.

Proactively deter loitering

Detect unusual behavior at ATMs such as prolonged loitering and let trained monitoring agents directly talk down to intruders to ward them off.

Get full context with every alarm

See what triggered an alarm, who was notified, and how remote agents responded — from verification and false alarm dismissal to police dispatch.

Known offender alerts

Reduce repeat attacks across branches. Get instant alerts when cameras detect flagged suspects with person of interest (POI) alerts.

Support rapid police response

Quickly share video clips or live camera feeds with law enforcement via SMS or a direct link to accelerate investigations and response.

Control access to restricted areas

Manage who enters high-security zones like vaults with role-based permissions, door-based alerts, and customisable door schedules.

Streamline branch operations

Advanced branch analytics

Track queue length and wait times at teller stations with advanced video analytics to optimise staffing and efficiency across locations.

Extend AI to existing cameras

Transition to the cloud at your own pace. Extend AI analytics to non-Verkada cameras via Command Connector – no full system overhaul required.

Support compliance requirements

Maintain PCI, GDPR, and SOC 2 Type 2 compliance with up to 365 days of on-camera storage, detailed audit logs, and automatic firmware updates.

Why Verkada?

No NVRs or DVRs
– up to 365 days of onboard storage

Unlimited user seats
and cloud archiving

Up to 10-year warranty
and predictable renewal costs

24/7 technical support
via email, phone or live chat

Cybersecurity protection
SSO, 2FA, and Enterprise Controlled Encryption

Automatic updates
to unlock new features and maintain security

Video Security

Secure critical sites with AI-enabled cameras that record 24/7, are bandwidth-efficient, and deliver exceptional image quality – even in low light.

Access Control

Automate staff credential provisioning and assign granular user permissions with cloud-based access control.

Alarms

Catch after-hours break-ins with cloud-managed intrusion detection and 24/7 professional monitoring.

Intercom

Protect bank and ATM access points – see who is at the door, answer calls from anywhere, and remotely grant access.

Panic Button

Provide staff at teller stations with a one-click emergency response that discreetly calls security or immediately dispatches police through an agent.

Guest

Streamline visitor check-ins at your HQ site with automatic photo ID and form capture, plus instant host notifications.

Air Quality Sensors

Customise alerts for noise, smoke, temperature, and other indicators to maintain safe working conditions for bank staff and customers.

Connectivity

Easily install cameras and devices in hard-to-wire locations like car parks or remote ATMs using cellular or Wi-Fi gateways.

Viewing Station

Stream up to 300 live camera feeds into one centralised location and gain instant visibility across your entire bank network.
