

COVID-19 RESPONSE SUITE

Proactively Protect Your Spaces Against COVID-19

Aimed towards enabling organizations to prepare for and respond to the COVID-19 pandemic, Verkada's COVID-19 Response Suite leverages Verkada's powerful edge-based computing capabilities to provide teams with increased visibility and insights into what is happening across their organization.

With these features, both essential organizations and existing customers can leverage Verkada devices to plan and respond to the pandemic while keeping both employees and guests safe.

Get Your COVID-19 Response Kit

We're here to support affected healthcare and essential organizations.

Visit verkada.com/covid-19-program/ to start your 90-day trial.

Response Suite Includes

- Motion Plotting**
 Real-time motion displayed as a heatmap, enabling teams to know where to monitor activity.
- Crowd Notifications**
 Instant alerts for when cameras detect a number of people in-frame that meet or exceed a predetermined threshold.
- Contact Tracing with Face Search**
 Search relevant footage containing a match for a person's face—even while wearing a mask—to detect affected individuals.
- People Heatmaps**
 A view of historical people-based activity to distribute locations prone to crowding, and enhancing cleaning and sanitation.
- Custom Schedules**
 Manage a return-to-work plan with custom schedules, giving employees access to the building and specific doors at certain times.
