

Simplify Security Management with an Integrated Solution

With Verkada's cloud-based security platform, financial institutions are modernizing the way they manage and access physical security across branch locations. Learn how banks, credit unions, and other financial institutions use Verkada to enhance branch safety and security operations, all while safeguarding sensitive information for PCI compliance.

Video Security

Hybrid cloud cameras offer onboard storage and edge-based processing to reliably deliver insights in real-time.

Access Control

Manage doors, credentials and users across sites at ease with global access and active directory integrations.

Sensors

With a collection of eight onboard sensor readings, monitor for the health and safety of all environments.

Alarms

Catch and respond to break-ins with cloud-managed intrusion detection and 24/7 professional monitoring.

Verkada Guest

Personalize the check-in experience for all types of visitors while integrating with cameras and access control.

Key Benefits

24/7 Proactive Security

Know instantly when repeat offenders are on site or suspicious activity occurs after-hours.

Prevent Theft and ATM Fraud

Control access with role-based permissions, and be alerted of motion or tampering.

PCI Compliance

Meet modern data security standards and innovative software capabilities by default — while eliminating NVRs, DVRs and on-premise servers.

Search Filters for Quick Investigations

Use powerful video forensics to filter people, vehicles, motion, and other attributes.

Share Video for Incident Response

Access, download, and share footage from any browser or mobile device in minutes.

Monitor From Anywhere

Remotely access doors, cameras and sensors without any VPNs or configurations.

Built For Your Organization

For IT Professionals

- Up to 365 days of on board storage and unlimited cloud-based archiving – no NVRs, DVRs, or external servers required.
- Integrates with existing IT workflows such as active directory and MFA.
- Secure by default – with HTTPS/SSL data encryption (in transit) and RSA + AES data encryption (at rest).

For Security Professionals

- Detect threats with customizable SMS alerts for People of Interest and unusual activity.
- Easily isolate events with advanced filters for quick investigations.
- Share live feeds, floor plans, or archived footage via SMS, MP4, or direct link.

For Branch Managers

- Monitor sites from one cloud-based platform, easily accessible through any web browser or mobile device.
- Control costs with predictable TCO and industry-leading 10 year warranty.
- Ensure compliance with full audit logs and a record of user, environmental, video or access-based events.

Customer Testimonials

Susquehanna Community Bank

“We now have a much higher level of confidence. If there is an incident, and my team needs to forward information to law enforcement, they can easily capture and transfer the footage.”

Bill Weber

Information Security Officer

Third Bridge

“My team no longer has to maintain and patch vulnerabilities in the system. Verkada’s product and team take on the bulk of the work; they’ve exceeded our expectations in terms of service and support.”

David Dodd

Head of Technology Solutions

Peoples National Bank

“We have had multiple times where having cleaner footage helped us determine if the right amount of cash was given out, or who the person was that was making the transaction, or to prove it was who they said they were.”

Eric Kruse

Director of IT, Networking, and Security

Bank of the James

“There are two line items: the hardware and the software. No secret support fees, no hidden software upgrade charges, and a 10-year warranty for all cameras. Verkada is a far better long-term financial investment.”

Phil Hampton

IT Specialist

Corporate Central Credit Union

“As a highly-regulated industry, we require a SOC-compliant data center to ensure security and confidentiality. Verkada met our criteria for secure data storage with AWS, which meets high industry standards for protecting our data.”

Brian Nowak

IT Director

Third Bridge

“The ability to highlight a particular area within frame and playback only motion events has already cut incident response time in half. These computer vision capabilities produce results in seconds.”

David Dodd

Head of Technology Solutions
