

Verkada Helix

Enterprise Video Search and Integration

Overview

Expand the value of Verkada's Command platform beyond physical security with Helix. Use your data to search for footage in Verkada Command to more easily conduct investigations.

Key features

Generate events unique to your organization

Create custom searchable events by pairing data from 3rd-party applications with Verkada video security footage

Search events with custom attributes

Define the attributes used by Helix to categorize events. Use flexible search tools to find specific video clips

Minimal set-up required

Helix can be set up quickly and easily using Verkada's public API endpoint and is available for all Verkada cameras

Example use cases

Retail

Validate credit card transactions through video evidence by integrating with point-of-sales systems

Healthcare

Verify prescription fulfillments by pulling in data from pharmacy management systems (PMS)

Manufacturing

Follow goods at every step of production by pulling in data from your enterprise resource planning system (ERP)

Time and attendance

Monitor employee work hours by integrating data from time and attendance software solutions
