Verkada

Intercom for
Higher Education

Overview

Verkada Intercom empowers higher education institutions to answer calls for entry and emergency faster and more effectively. Help students, visitors, and faculty feel safe at all hours with strategically positioned blue light stations across campus greens and buildings. Welcome and keep track of all campus entry events, whether it's an alumni stopping by a department office or a parent visiting a student at a residence hall.
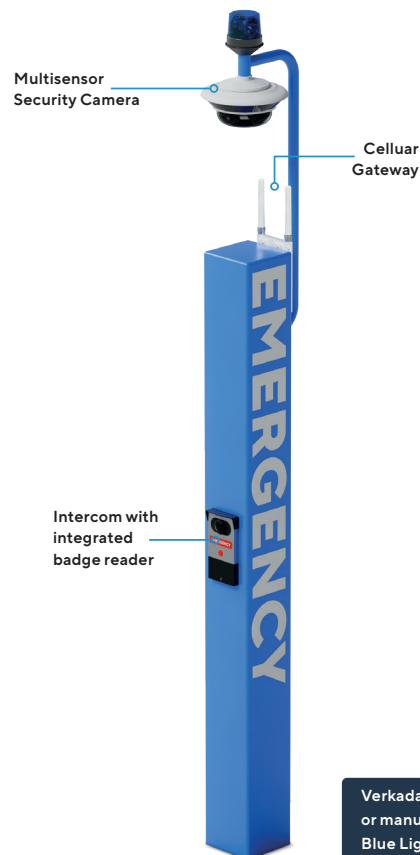

Use Cases

Entry management

Visually verify visitors, communicate with two-way audio, and remotely unlock doors to facilitate secure and seamless entry.

Emergency calling

Enhance student safety, respond to emergencies quickly, and gain visibility into new areas of campus by integrating intercoms into blue light stations.

Multisensor Security Camera

Celluar Gateway

Intercom with integrated badge reader

Verkada does not offer or manufacture finished Blue Light Stations

Key Features

Clear audio, sharp video

With noise cancellation, a 5MP camera, and IR LEDs, clearly see and hear callers in diverse environments to respond appropriately.

Flexible call routing

With dynamic call routing, enable SOC teams to field cross-site calls, or let receptionists answer calls on-the-go via mobile.

In-call POI alerts

Flag persons of interest - like prank callers - with advanced facial analytics and deny entry or deter bad behavior with talkdown functionality.

Enterprise insights

Centrally monitor entry and emergency call events across campus, with detailed dashboards, events reporting, proactive alerts, and more.

Where to Install?

- Campus Greens
- Administration Buildings
- Department Offices

- Athletic Facilities
- Residence Halls
- Parking Garage

- Delivery Zones
- Lab Areas
- Restricted Archives

With cloud-based call routing and multiple receiver options - Verkada Desk Station, Verkada Command on web, Verkada Pass app, Verkada Command mobile app, and existing communication systems - organizations can take calls from anywhere and boost response rates. All Verkada receivers support video feeds from intercom and context cameras as well as one-tap controls.

One Integrated Cloud-Based Platform

Video Security

Pair eye-level intercom cameras with neighboring context cameras for comprehensive visual context.

Access Control

Facilitate seamless staff entry using the intercom's built-in badge reader and door controller.

Guest

For end-to-end visitor management, grant entry with intercoms and provide a frictionless sign-in experience and digital log with Guest.
