

## Call for help, wherever you are

Whether it's an armed intruder, assault, or medical emergency, situations that require immediate action can crop up anytime, anywhere. Verkada's panic button enables you to immediately call for help, while leveraging other Verkada devices to provide additional context about an incident.

Wireless panic buttons can be worn on a lanyard or mounted on a wall or under a desk. You also get access to a digital panic button, accessible from the Command dashboard on a computer or mobile device.

### Key Features

#### Easy to Set Up

Wireless panic buttons pair automatically with the Verkada Wireless Alarm Hub. Easily set up and manage settings in the Command cloud dashboard, even on-the-go.

#### Completely Customizable

Choose from single, double, triple, or long press to reduce false alarms. Decide who will be notified and whether emergency services should be contacted directly.

#### Integrates with Verkada Ecosystem

Easily find the camera feeds associated with a panic button's location, initiate a door lockdown procedure, or trigger alarm responses such as sirens or strobe lights, all from Command.

#### Monitor Device Status

Feel confident that your devices are working as expected in case of emergency. Get notified if a panic button goes offline or reports low battery.

### Key Benefits

- Customizable button triggers and responses
- Integrates with other Verkada devices for added security and visibility
- Built-in 24/7 professional monitoring with video verification
- LED indicator to signal a successful transmission
- Notifications if a button goes offline
- Up to 5 year battery life
- 10 year warranty on all hardware
