

Security Anywhere, Anytime

Proactive protection for remote and temporary sites

Remote Cameras | Gateways | Surveillance Trailers

Protect a large perimeter, provide coverage for a remote site, or simply move your security setup as needed with Verkada's hybrid-cloud remote security solutions.

No power? No Internet? No problem

Easy to Set Up	Powerful to Use
Eliminate on-prem servers and enjoy easy installation and minimal maintenance, while ensuring maximum reliability.	Detect, deter, and respond faster with LPR, real-time alerts, AI-power investigations, and alarm deterrence.
Remote, multi-site management lets you securely manage devices and users from a computer or phone — anywhere, anytime.	Manage and monitor in Command , including battery level, solar input, network status, and more.
Stay powered and connected thanks to built-in LTE and various power options, including solar.	Automatic firmware updates keep your system secure and up-to-date with no manual work.
Deploy in minutes with plug-and-play power sources, built-in connectivity, and automatic connection to the cloud.	Deter cybersecurity threats with enhanced user security — SSO, MFA, and SAML authentication.

City of San Luis Obispo

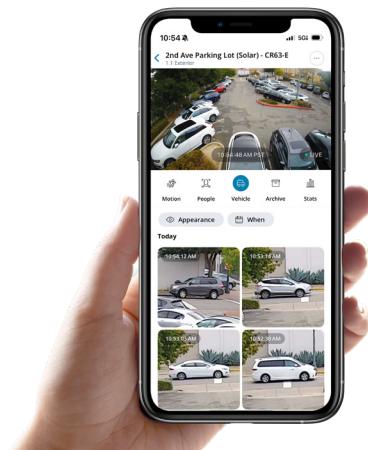

"What truly set Verkada apart was the willingness to innovate in ways that traditional security solutions did not. We can now bring Verkada devices into the wild, in the middle of nowhere, without traditional city network infrastructure."

Chad Pfarr,

Administrative Lieutenant

Coverage where you need it

Parking Lots

Capture license plates at every entrance and exit, and get alerted about suspicious activity well before it reaches the building.

Industrial & Utilities

Protect critical machinery and use AI-powered analytics to help prevent accidents and speed up investigations.

Construction Sites

Choose from various infrastructure-free deployment options that make security quick to set up and easy to move.

Roadsides

Discourage illegal activity and get alerted if a specific kind of vehicle or a license plate of interest is seen.

Choose the right solution for your site

Remote Cameras with LTE

- **Various power supply options:** Alongside a 24-hour internal battery, provide additional power via passive PoE, AC/DC, or solar power with a backup battery.
- **Built-in LTE connectivity:** A built-in LTE modem simplifies install without the need for a gateway.
- **Excellent image quality:** Enjoy 24/7 streaming and impeccable image quality with 4K resolution and optical zoom.
- **Advanced analytics:** Choose to use the camera for LPR or people and vehicle analytics, as well as features like AI-powered search and alerts.

Cellular & WiFi Gateways

- **Connect any Verkada cameras:** Gateways connect to LTE or Wi-Fi and provide 60W of power across 2 PoE outputs for Verkada cameras.
- **Plug-and-play installation:** Outdoor gateways work with almost any power source and can be installed without a NEMA box and PoE switch.
- **Easily manage in Command:** One dashboard for all your devices allows for easy management and troubleshooting from anywhere.
- **Verkada data plan or BYO SIM:** Optional Verkada data plan offers unlimited data, multi-carrier redundancy, and works out of the box.

Cloud-Managed Security Trailers

- **Get the full power of Verkada devices:** Leverage LPR, PTZ, sentry mode, and integrated alarm deterrence.
- **Cloud-managed in Command:** Monitor, manage power, and investigate – all from a single pane of glass.
- **Easy to install:** Leverage pre-wired and Verkada-compatible arm mounts, built-in PoE, and Command onboarding via QR code.
- **Simple to design:** Easily design your trailer to meet uptime requirements with our easy-to-use configurator.
