

Rapid Emergency Response for K-12 Schools

Lock down faster. See clearly. Reunite safely.

The challenge

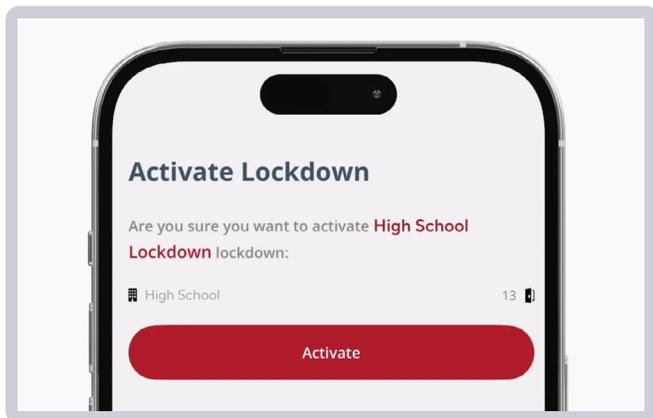

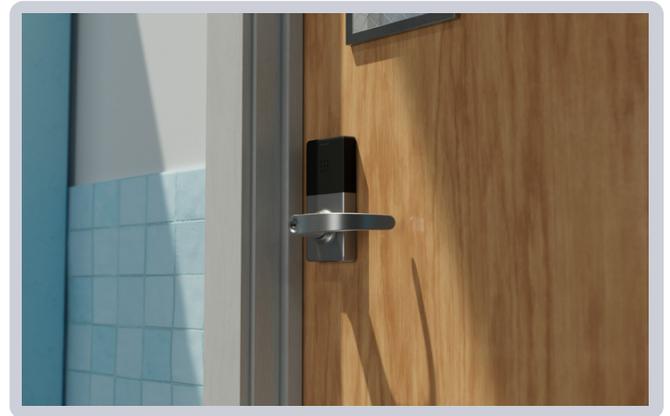

When emergencies happen, schools must act immediately—often with limited staff and disconnected systems.

Common gaps include:

- Lockdowns that require manual steps across multiple doors
- Limited real-time visibility during fast-moving incidents
- Reunification processes that are difficult to run in a controlled, auditable way

The Verkada solution

A cloud-managed platform that unifies wireless locks, access control, cameras, and reunification workflows—so schools can respond with speed and confidence.

Emergency response, simplified

Fast, coordinated lockdown

- Bring more classroom doors to the cloud with wireless locks
- Trigger lockdowns in seconds from web, mobile, panic button, or third-party platforms
- Eliminate door-to-door manual locking
- Get immediate visual confirmation during incidents
- Powerful AI models deliver results to custom search queries in seconds.

Take immediate action from anywhere

- Change door states in real time (lock, unlock) from any connected device
- Empower leaders to respond on-site or off-site with mobile access

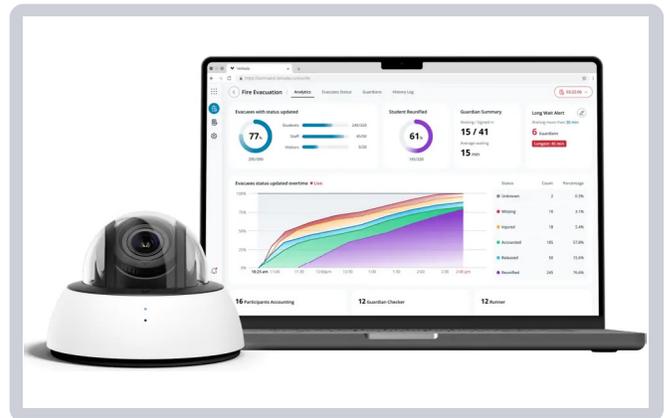

See what's happening in real time

- Receive alerts (e.g. door forced open) to recognize threats faster
- Instantly confirm door events and activity with integrated cameras
- Use live and recorded video to make informed decisions during emergencies

Manage post-incident reunification

- Verify guardians and screen pickups before release
- Automate rosters via SIS (Clever, ClassLink, PowerSchool)

See it in action

Respond faster and maintain control throughout an incident with lockdown controls, real-time visibility, and reunification workflows on one platform.
