

Modern Cloud-Based Security for Schools

Protect students and staff in a privacy-sensitive manner with a unified physical security platform.

verkada.com

Leading Cloud-Based Physical Security

Legacy systems are falling short of the rising safety needs of today's primary and secondary schools. Join a global community of academic organisations using Verkada's cloud-managed physical security platform to raise the standard for school safety. Unify complex, siloed security systems under one platform to speed up investigations, accelerate incident response, and give school leaders greater peace of mind – all while protecting student privacy and enhancing cyber security.

Verkada is #1

* 2023 Novair Insights market share data for video surveillance cloud solutions (world excl. China).

**2024 Omdia worldwide market share data for cloud-native, access control solutions that push mission-critical services into the provider's cloud tenancy; excludes ACaaS solution providers that materially split the execution locus for analytics between on-premise hardware and cloud.

Why Schools Choose Verkada

Experience a new level of simplicity with Verkada. All you need is the hardware and access to Command, our software platform, which updates automatically. Centrally manage all Verkada devices and users from any browser or mobile device. Gain actionable insights with information integrated across devices.

Accelerate investigations with instant alerts and optional AI-enabled analytics

Empower administrative staff with a user-friendly and intuitive system

Access footage from anywhere and monitor site activity in real time

Instantly share live camera feeds with police and generate incident reports

Protect student privacy with live or selective face blur and privacy regions

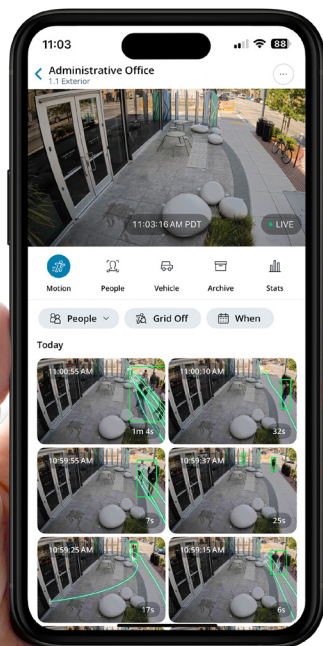

Deter cyber security threats with enhanced user security — SSO, 2FA, and SAML authentication

Easy multi-site management with granular, role-based user permissions

IT-friendly with bandwidth-efficient cameras and zero servers or NVRs to manage

Top-rated technical support — available 24/7 via email, phone, or live chat

Compliance with industry standards — SOC 2 Type 2, ISO 27001/27017/27018/ 27701, and support for GDPR requirements

Mayfield School of Portsmouth

"I'm able to be more thoughtful about our approach to physical safety because Verkada provides a level of insight [about campus activity] that I didn't have before."

David Jeapes,
Head Teacher

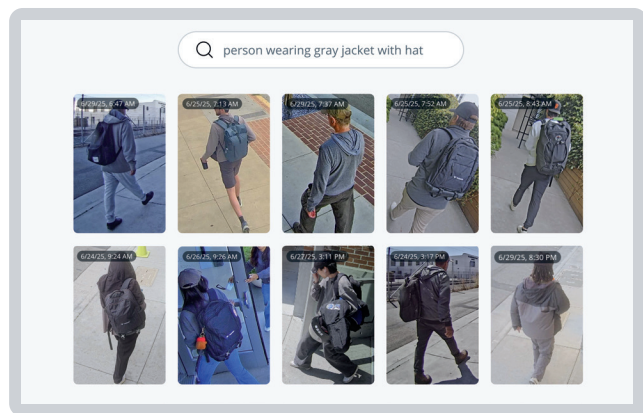

Brighton Grammar School

"Verkada allows us to strike the right balance between safety and privacy, ensuring each one without compromising the other."

Sandra Maher,
Director of ICT

Empower Safer Campuses for Students and Staff

Deter student vaping with proactive alerts

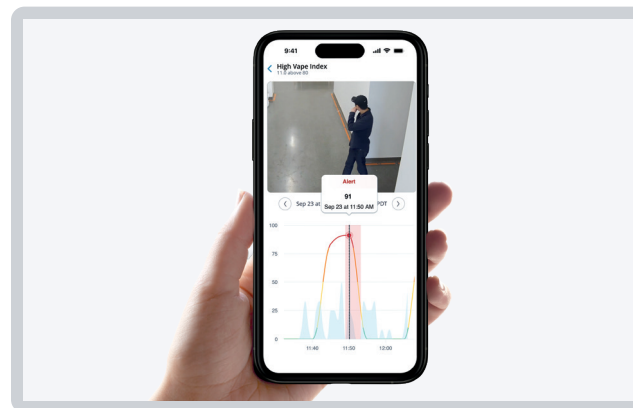

- Receive instant SMS alerts when air quality sensors detect vaping on school grounds.
- Deploy optional video monitoring in school corridors to provide visual context around vape alerts and the students involved. School leaders can view vaping trends over time to analyse patterns and implement long-term solutions.

Protect against external threats

- Quickly identify unsafe visitors at school entrances and deny entry with Verkada Intercom in-call (POI) alerts. Notify security teams instantly when flagged visitors approach school grounds, enabling rapid intervention.
- Easily set role-based user permissions to help ensure only authorised staff can access footage from specific cameras.

Speed up investigations with privacy in mind

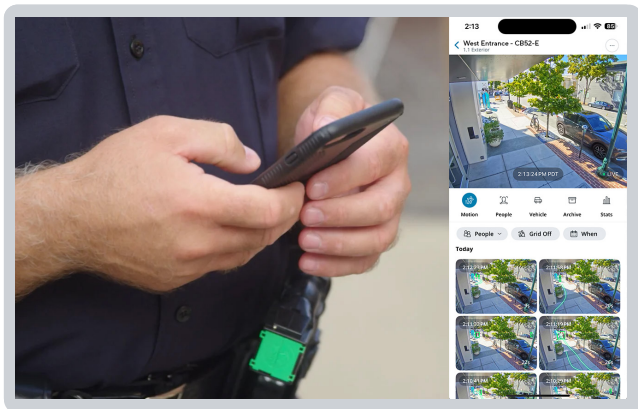

- Quickly find critical footage across school grounds. Simply type a description or upload a photo to retrieve relevant video.
- Trace a person's journey across multiple cameras and locations with AI-powered unified timeline, viewing their path on a floorplan for faster investigations.
- Protect student privacy with live face blur during real-time monitoring. Plus, easily blur the faces of uninvolved individuals when saving footage for review.

Strengthen perimeter security

- Keep bad actors out with cloud-managed access control. Set customised door schedules and restrict building access to designated timeframes.
- Mitigate the risk of after-hours trespassing and vandalism with professional monitoring and video verification, helping to reduce false alarms and incident response time.

Accelerate Incident Response and Enhance School Safety

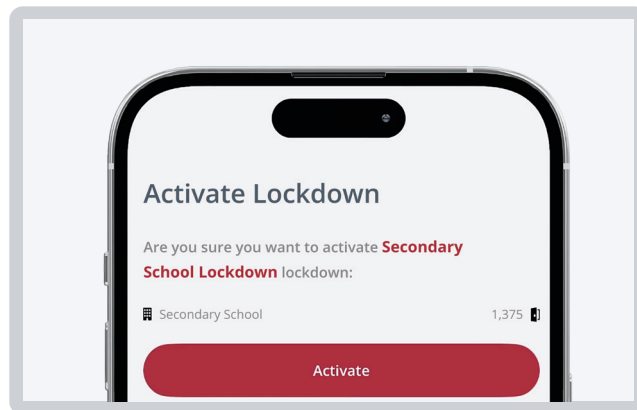

Coordinate faster with police

- Reduce incident response time by streaming camera footage directly to police Real-Time Operations Centres (RTOCs) through Verkada's Real-Time Streaming Protocol (RTSP).
- School leaders can share live floorplans via SMS or a direct link to reveal school activity hotspots and assist responding officers onsite.

Initiate a lockdown procedure

- Instantly lock down exterior doors across campus at the press of a button from a smartphone or desktop, restricting access to select buildings.
- Easily set custom lockdown scenarios and specify which doors to secure, enabling a targeted response for a single building or the entire site based on the type of incident.

Monitor school air quality

- School leaders can analyse historical data from cloud-managed air quality sensors and apply these insights to reduce indoor air pollutants.
- Receive instant alerts for abnormal spikes in noise or temperature on campus, signalling a potential large gathering or student fight.

Improve response for future incidents

- Enhance emergency preparedness in the case of an incident or urgent medical situation with mounted panic buttons, calling emergency responders with a single click.
- Review historical footage from real-life events or past safety drills to assist school safety leaders in future emergency planning.

Maximise Efficiency for Optimal Operations

Manage security operations with ease

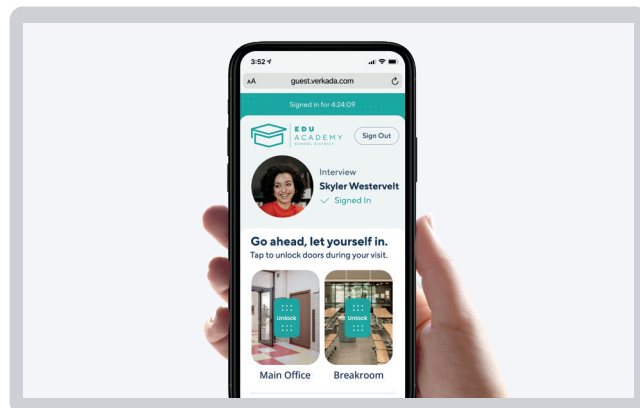

- New staff members can download the Verkada Command mobile app and find, save, and share footage in minutes.
- An intuitive user interface and plug-and-play installation simplify maintenance and empower lean IT teams with simple cloud-based management.

Streamline check-ins and dismissals

- Streamline student late arrival tracking and early dismissal sign-outs with Verkada Guest, a digital visitor management system integrates with SIS platforms like PowerSchool, Clever, and ClassLink.
- Easily add returning visitors to approved guest lists for faster check-in via QR code or facial recognition.

Enhance safety during pick-ups and drop-offs

- Keep watch over car parks and nearby streets.
- Capture number plates of unsafe drivers with powerful automatic number plate recognition (ANPR) technology and easily share this information with police.
- Notify school leaders or police when flagged vehicles approach the school for fast intervention.

Simplify badge and keycard management

- Save time provisioning badges with cloud-based access control. Automatically issue physical badges, EV3 fobs, and mobile keycards to new staff – or instantly revoke them when someone leaves the organisation.
- Quickly generate temporary mobile access credentials or physical badges for visitors using Verkada Guest.

One Platform to Simplify School Security

Video Security

Record 24/7 with AI-enabled cameras that store up to 365 days of footage. Choose from models that support privacy-sensitive features such as live face blur and privacy regions.

Intercom

See who's at the school entrance. Grant building access to visitors remotely from the front desk. Know if a suspect returns to campus with in-call person of interest (POI) alerts.

Mailroom

Optimise delivery management by tracking package drop-offs with a simple mobile scan and automatically notifying recipients upon delivery.

Access Control

Automatically provision or revoke staff credentials via SCIM and SAML integrations. Remotely grant building access and automate door schedules with cloud-based access control.

Guest

Streamline check-ins and automate badge printing with a digital visitor management system. Track student tardiness via integrations with Powerschool, Clever, and ClassLink.

Connectivity

Easily deploy Verkada devices with cellular or Wi-Fi gateways in hard-to-wire locations like car parks, gates, fields, and stadiums.

Alarms

Deter trespassing and vandalism with cloud-managed alarms and intrusion detection. Reduce false alarms with built-in professional monitoring and video verification.

Air Quality Sensors

Set custom alerts for noise, vape, CO2, TVOCs, particulate matter, formaldehyde, and other air quality indicators to detect potential hazards on school grounds.

Viewing Station

Stream up to 300 live camera feeds from multiple sites into one centralised location and gain instant visibility across the school campus.

Try Verkada for free

Our 30-day free trial includes a device, two-way shipping, and full access to the Command management platform. Learn how we can support your smooth transition to the cloud by bridging non-Verkada devices to our cloud-based system.
