

Trusted Protection from Slip-and-Fall Claims

Overview

Capture objective video evidence, streamline reporting, and protect your business from fraudulent or costly incidents. Verkada helps safeguard your organization with incident management tools that can help reduce insurance costs, defend against false claims, and simplify investigations.

Key Benefits

Detect Incidents in Real Time with AI-Powered Alerts

Move beyond reactive investigations with AI-powered alerts. Teams can create custom alerts for slip, trip, and fall incidents using natural language queries — such as “person near wet floor.” When cameras detect a match, staff receive immediate notifications to respond, document, and prevent incidents from escalating.

Accelerate Investigations and Training

Rapidly investigate workers’ compensation claims, near misses, and injuries. Quickly locate incidents by using AI-powered search or filtering by clothing color, vehicle type, or attributes. Incident footage not only helps identify false claims, but also supports employee training and safety protocols.

Prove or Prevent Liability

Monitor high-risk areas like lobbies, entryways, or aisles for spills, leaks, or obstructions. Combine clear video evidence with audit trails to validate safety procedures and defend against fraudulent claims.

Capture Verifiable Evidence

Archived clips are securely stored in the cloud, time-stamped, and encrypted at rest and in transit. With Verkada Verify, external parties — such as law enforcement or insurance — can independently confirm footage integrity without requiring a login.

Trusted by Leading Organizations

Streamline Investigations with History Player Search

Once the subject of interest is identified, History Player Search instantly reconstructs a chronological timeline of where that individual appeared across multiple cameras. Instead of scrubbing through hours of video, teams can surface a clear overview of events in seconds.

Simplify Reporting and Claims Management

Turn investigations into professional, defensible reports in just minutes. With Incident Management tools, teams can:

- Combine video clips, images, and notes into a single record.
- Generate a polished PDF report with evidence, timestamps, and audit logs. Share swiftly with insurers, attorneys, or regulators.

Empower HR, Risk, and Safety Teams

Give your teams an intuitive platform to access footage, share notes, and manage all incident records in one place. Preserve crucial evidence with unlimited archiving while collaborating securely with external stakeholders. Permissions and audit logs help ensure every action is documented.

Recommended Solutions

Video Security

AI-enabled cameras with 24/7 recording, up to 365 days of onboard storage, and industry-leading image quality. No DVRs or NVRs required.

Mini Series

Compact, discreet cameras that deliver enterprise-grade security with advanced edge analytics—small in size, powerful in performance.

Dome Camera Series

Durable cameras built for performance and scale, with up to 40m IR range for reliable visibility in both standard and low-light conditions.

Fisheye Camera Series

Panoramic 180°, four-way split, or immersive pan-tilt-zoom views provide expansive coverage and flexible monitoring from a single device.

Multisensor Series

Multiple adjustable sensors in one device deliver expansive coverage and efficient installation, reducing blind spots with fewer cameras.

Testimonials

Proved a false injury claim was fabricated

"Within two weeks of installation, we faced a false injury claim that, with our old system, would have gone undefended. With Verkada's detailed footage, we proved the claim was fabricated. This alone could save us enough to cover the entire system's cost."

Sonya Wilson

Executive Director,

Quick access for attorneys and insurers

"Verkada solves all our needs for archiving, downloading, and sharing video. We can grant attorneys or insurance companies quick access, even months later, to protect ourselves against false slip-and-fall claims."

Santo Dalmazio

Owner and Managing Partner,
