

Improve Campus Safety with an Integrated Security Solution

With Verkada, hardware and software are fully integrated in an intuitive, cloud-based platform to enable secure remote monitoring and faster emergency response. Learn how colleges, universities, and institutions of higher education use Verkada to strengthen safety while simplifying security management.

Products

Video Security

- Centralize video monitoring across your entire campus.
- Secure campus sites with proactive alerts for unusual motion or repeat offenders.
- Tested and rated for durability and use in high-traffic environments.

Access Control

- Verify door-based activity with video evidence of who came and went.
- Provision staff with tiered access levels across various points of entry.
- Schedule doors to lock or unlock based on school hours and bell schedules.

Sensors

- Detect vaping, smoking and fighting in places such as bathrooms or locker rooms.
- Be alerted of any sudden changes in temperature, noise levels or air quality.
- Monitor environmental conditions to protect students, staff, and IT equipment.

Key Benefits

Protect Student Privacy

Control access with role-based permissions and blur faces with one-click.

Real-Time SMS Alerts

Set proactive alerts to be notified of suspicious activity occurring in critical areas or after hours.

Search Filters for Quick Investigations

Use powerful video forensics to filter people, vehicles, motion, and other attributes.

Share Video for Incident Response

Share live video, footage or entire floor plans to first responders from any browser or mobile device in minutes.

Lockdown Doors in Seconds

Create custom Lockdown events to secure doors in the event of an emergency.

Monitor From Anywhere

Remotely manage doors, cameras, and sensors from any browser or mobile device – no VPNs or configurations.

Built For Your Organization

IT & Security Professionals

- Plug-and-play with a simple PoE connection – no NVRs, DVRs, or complex configurations.
- Set user-based roles across your organization to ensure proper access.
- Secure by default with automatic updates and end-to-end encryption.

Superintendents & Administrators

- Monitor sites from one cloud-based platform, easily accessible through any web browser or mobile device.
- Control costs with predictable TCO and industry-leading 10 year warranty.
- Easy-to-use without time-consuming training or onboarding.

Campus Patrol & Faculty

- Detect threats with customizable SMS alerts for People of Interest and unusual activity.
- Quickly isolate events with advanced filters for quick investigations.
- Share live feeds, floor plans, or archived footage via SMS, MP4, or direct link.

Customer Testimonials

Greenfield Community College

“In an emergency situation, we can secure the building in seconds rather than minutes. I can lock our exterior doors almost instantly through my phone or computer, which is a level of control we didn’t have before.”

—
Alex Wiltz
Director of Safety, Chief of Police

Bath Spa University

“The desktop experience and app are both incredibly easy to use. I’m able to do everything, end-to-end, from wherever I am: activate the cameras, assign permissions, find footage, archive clips, or share feeds with outside folks.”

—
Andy Williams
Head of Facilities and Services

Pasadena City College

“Being able to say ‘I’m looking for a Honda Accord’ and have the system identify it makes footage retrieval so easy. It took me 10 minutes to train campus police on how to use Verkada, and they were just floored by what it could do.”

—
Matthew Camara
Assistant Director of Technical Services

South Louisiana Community College

“Within the first few weeks of implementing Verkada, an incident occurred on campus. In a matter of minutes, campus security was able to pinpoint the footage they needed to act immediately and resolve the situation.”

—
Brad Breaux
CIO

Pasadena City College

“People and vehicle analytics came with an automatic software update without us having to lift a finger or spend a penny. No other solution on the market makes improvements and upgrades this easy.”

—
Matthew Camara
Assistant Director of Technical Services

Greenfield Community College

“We set tiered-level access for different user groups to restrict entry into controlled areas... if I see that someone needs access to a particular building, I can simply click on the door and let them in from my computer or phone.”

—
Alex Wiltz
Director of Safety, Chief of Police
