

Build a Payment Solution That Works for Your Business

Deploy Verkada as a predictable cost that's paid over time

Physical security solutions are increasingly treated as operating expenses instead of bulk capital expenditures. With equipment finance options from Verkada and our partners, you can deploy a physical security solution and pay for it with a flexible payment plan that is customized for your business needs.

How it works

- Customers deploy Verkada’s cloud-managed physical security solution as an operating expense paid over time instead of a bulk / upfront equipment purchase.
- All project costs including installation, hardware, and cloud licenses can be paid over time.
- Projects can be financed for up to 10 years and customers can customize a payment schedule that works best for them.
- Financing options are offered through Verkada’s finance partners. Customers pay finance partners directly.

Key benefits

Secure now, pay later

By paying for a Verkada project over time, you can pursue projects that meet your critical security needs but may exceed your current budget.

Lower upfront costs

Everything from cloud licenses to installation costs can be paid over time through ongoing payments.

Unlimited flexibility

Whether it’s 100% financing with no money down, small initial payments with a balloon payment, or just spreading costs out evenly over time - payment plans can be custom built to meet your needs.

Benefits of Equipment Financing
