

# VerkadaOne

Denver 2024

A technology and innovation exposition focused on creating smarter, safer buildings.

September 17 - 19  
Colorado Convention Center

Overview

VerkadaOne is our annual technology conference designed to represent and underscore the power of a platform approach to physical security technology. The event brings stakeholders from IT, security, operations and more together to connect, learn, have fun, and explore the latest cloud platform physical security technologies.

VerkadaOne 2024 aims to bring the most innovative technologies and people together in one place to unpack and understand exactly what’s driving industry innovation today.

<b>Event Registration</b> VerkadaOne passes include full access to the event, sessions, and activities.	
<b>Early Adopter</b> Register before May 1 to get the best price.	\$699
<b>Early Bird</b> (before 8/1)	\$799
<b>General Admission</b> (after 8/1)	\$999

What to expect

- Keynote events**

Get a fresh look at the industry with keynote, product, and guest speaker events on the main stage.
- Insightful breakouts**

Hear industry insights from the people deploying the latest technology.

- Technical innovation labs**

Double-click into fresh innovations and technologies through product and technical deep-dive sessions.
- Hands-on training**

Learn more about the latest smart building technologies and applications with hands-on training sessions and live demos.

- Industry panel discussions**

Hear directly from other leaders to get a contextual understanding of physical security applications across industries.
- Networking events**

Explore Denver with social and outdoor activities.

## Why attend VerkadaOne?

### Defining Technology

Unpack and explore exactly what's driving innovation and what it means for your organization.

**Technical breakout sessions** to go behind the scenes of cutting-edge technology and engineering innovations like AI, cloud computing, security, and system integrations.

**Product and platform keynote events** featuring product announcements and updates from across Command.

**Hands-on product labs** designed to unpack and explore all the technologies used to create smarter, safer buildings.

### Industry Insights & Connections

Connect with industry leaders to tackle the most important questions you face as you create smarter, safer buildings.

**Expert keynote speakers and round-table discussions** focused on topics like privacy, improving day-to-day operations and safety, and safely using AI in applications involving the physical world.

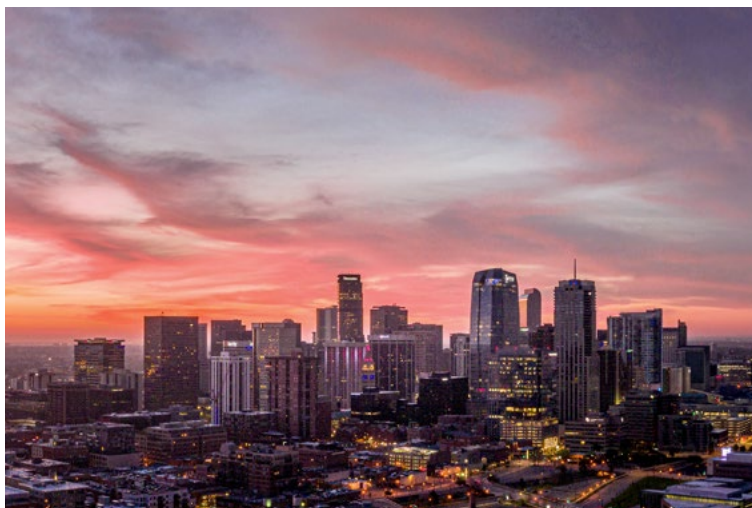

**Hands-on training tracks, certifications, and product demos** that give everyone who touches building technology the tools they need to make their buildings smarter and safer.

### Partner Ecosystem

This year, we're inviting even more industry partners from across the ecosystem to speak and join the VerkadaOne expo hall.

**Speaking opportunities** for industry thought leaders and partners - from IT to EHS.

**Expo hall booths** to showcase your products and services and how they integrate with the Verkada platform.
