

## CB63-E Bullet Camera

Highly-detailed 4K coverage  
in outdoor environments

### Overview

The CB63-E Bullet Camera features a 1 / 1.2" progressive CMOS image sensor, varifocal lens with 2.25x optical zoom, and IR LEDs with 50 meters / 164 feet of range for detailed 4K coverage in a variety of lighting and weather conditions. The CB63-E includes an onboard CV72S Ambarella processor for advanced analytics like AI-powered unified timeline, AI-powered activity detection alerts, occupancy trends, and person of interest (POI) alerts. In addition, the CB63-E supports license plate recognition (LPR), enabling the device to capture license plates on vehicles traveling at speeds up to 80 mph / 128 kph across as many as three lanes of traffic. The CB63-E is ideal for exterior coverage and perimeter protection, delivering highly-detailed coverage designed for areas with frequent people and vehicle traffic. Its LPR capabilities can also grant access at vehicle gates, or be used to monitor vehicle flow and occupancy in a given area.

The CB63-E withstands demanding environments with an IP66/67 weather rating and IK10 impact rating. A built-in visor keeps precipitation out of the camera's field of view, while a proprietary internal heating mechanism combats condensation. The underside of the device features an attachment interface that can be used to connect external IR or white light illuminators. Designed with easy and efficient installation top-of-mind, the CB63-E features a single tool install, a latch-based cable gland for easy PoE threading, and LED status light indicators.

### Key features

#### Superior image quality

- 1 / 1.2" progressive CMOS image sensor
- 4K resolution
- Varifocal lens with 2.25x optical zoom
- 50 meters / 164 feet of IR range for optimal nighttime viewing

#### Advanced analytics

- Onboard CV72S Ambarella processor enables advanced analytics
- License plate recognition capabilities capture license plates at speeds up to 80 mph / 128 kph
- AI-powered unified timeline and AI-powered activity detection alerts
- Occupancy trends and LPR zones for operational insights

#### Hybrid cloud architecture

- Onboard storage and processing for reduced bandwidth consumption and coverage at scale
- 30 - 120 days (512GB - 3TB) of onboard storage
- Redundant cloud backup and unlimited cloud-based archiving of footage

#### Streamlined installation

- Attachment interface for connecting external IR or white light illuminator
- Latch-based cable gland for easy PoE threading
- Mount plate, junction box adapter, and screw pack included
- Three-LED status light indicator

#### Durability and weather protection

- IP66/67 weather rating
- IK10 impact rating
- Operability between -40°C to 50°C / -40°F to 122°F

1. All our cameras record in "adaptive quality," capturing both standard (SQ) and high quality (HQ) streams. SQ video is stored up to the amount of retention specified by the customer. The amount of HQ video stored on the camera will depend on the amount of motion detected by the camera over time. To learn more, visit our website: <https://docs.verkada.com/docs/adaptive-quality-recording-whitepaper.pdf>.

2. Lens Distortion Correction (LDC) crops the sensor field of view to deliver a rectified, undistorted output image.

3. Frame rate can be adjusted by support.

4. Extended temperature range includes operating temperatures below -10°C/14°F and assumes IR will be enabled.
