

CR63-TE Telephoto Remote Camera with LTE

Easily monitor areas at distance without power or internet

Overview

The CR63-TE Telephoto Remote Camera brings high-resolution coverage to longer distances in areas without power or internet. Built for rapid deployment, it features an internal battery and built-in LTE modem while supporting flexible external power options, including solar.

If continuous power is available, the CR63-TE can be hardwired via included AC and passive PoE adapters¹. For deployments in areas without existing power infrastructure, a solar panel and one or more backup batteries can be used. A built-in LTE modem simplifies installation without the need for a standalone cellular gateway.

The CR63-TE delivers 24/7 streaming and 4K image quality with a motorized telephoto lens (15.0mm-50.0mm) designed to isolate far-away details. The powerful lens enables license plate recognition (LPR) to capture plates on vehicles across 3 lanes of traffic at distances up to 400ft during the day.

With sealed interior components and IP66/IP67 weather and IK10 impact ratings, the CR63-TE can withstand extreme temperatures and precipitation, allowing it to be deployed in a variety of environments.

Key features

Various power supply options

- Passive PoE¹, DC, and power tap adapters
- External backup battery
- 100W solar panel

Excellent image quality

- 4K resolution
- 1 / 1.2" progressive CMOS image sensor
- Varifocal telephoto lens
- 98ft / 30m IR range for nighttime viewing

Built-in LTE connectivity

- Built-in LTE modem to provide connectivity in areas without internet
- Choose between Verkada's data plan or bring your own

Advanced analytics

- Onboard CV75S Ambarella processor enables people and vehicle analytics
- License plate recognition capabilities capture license plates across 3 lanes of traffic up to 400ft away
- AI-powered search and AI-powered alerts
- Occupancy trends for operational insights

Hybrid cloud architecture

- Onboard storage and processing for reduced bandwidth consumption and coverage at scale
- 30-120 days (512GB-3TB) of onboard storage
- Redundant cloud backup and unlimited cloud-based archiving of footage

¹. PoE pigtail must be used with 48-57V passive PoE.

Verkada data plan

Verkada takes away the challenge of working with cell carriers with our hassle-free data plan, which works out of the box in many countries across the world.

Key benefits

Instant connectivity out of the box

As soon as it receives power, the CR63-E's built-in modem will automatically connect to a carrier using the pre-inserted Verkada SIM card – it just works.

Unlimited data

Unlike most carriers, which throttle your speed after a certain threshold, Verkada offers truly unlimited data.

Country/region

US

Multi-carrier redundancy

The Verkada SIM card works across major carriers, allowing the CR63-E to automatically switch carriers if the current network is down.

24/7 support

Enjoy the quick and easy 24/7 customer support that you've come to expect from Verkada.

Carriers used

Verizon, AT&T, T-Mobile

Bring your own data plan

Customers also have the option to bring their own data plan. For a list of carriers that have been tested and verified by Verkada, please refer to the [knowledge base article](#).

Always connected

Customers can insert their own SIM card in one slot while keeping the Verkada SIM in the other slot for automatic failover. If the customer-provided SIM fails, the Verkada SIM helps ensure that the camera is always reachable.

Flexible configuration

Customers may also use their own SIM cards in both slots. In this case, customers can configure one slot as the primary SIM and use the other for automatic failover if needed.

CR63-TE

Tech specs

Camera features

Image sensor	1 / 1.2" progressive CMOS	Shutter speed	1 / 30 sec. to 1 / 10,000 sec.
Sensor resolution¹	4K (3840 x 2160)	Day/night	IR-cut filter for day and night function
Lens type	Varifocal; motorized zoom	IR-cut filter	Yes
Focal length	15mm - 50mm	IR range	98ft / 30m
Aperture	F1.38 - F1.5	Minimum illumination	0.009 lux @ F1.9 (color) 0 lux with IR illuminators on
Iris	P-iris	Onboard storage	Capacity: from 512GB to 3TB Card: microSD, SDXC
Field of view (after LDC²)	Horizontal: 48° - 13° (41° - 13°) Vertical: 23° - 7° (23° - 7°) Diagonal: 52° - 15° (46° - 15°)	CPU	Ambarella CV75S88
Sensor movement	Tilt: 0° to 90° Pan: 360° Rotation: 360°		

Standard video settings

Compression	H.265, H.264	Historical video settings	Adaptive quality ¹
Frame rate³	24fps	WDR technology	True WDR, dual exposure
Live streaming settings	High quality (HQ): Up to 4,500 Kbps Standard quality (SQ): Up to 600 Kbps (default)	RTSP	Not supported

Standard audio settings

Audio	Supported	Interface	Built-in microphone
Audio capacity	One-way audio	Effective range	16ft / 5m

1. All our cameras record in "adaptive quality," capturing both standard (SQ) and high quality (HQ) streams. SQ video is stored up to the amount of retention specified by the customer. The amount of HQ video stored on the camera will depend on the amount of motion detected by the camera over time. To learn more, visit our website: <https://docs.verkada.com/docs/adaptive-quality-recording-whitepaper.pdf>

2. Lens Distortion Correction (LDC) crops the sensor field of view to deliver a rectified, undistorted output image.

3. Frame rate can be adjusted by support.
